Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-3 and 10-18, drawn to a nanocomposite, classified in class 252, subclass 500.
- II. Claims 4-9 and 19-23, drawn to a matrix and products, classified in class 252, subclass 62.2.

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because combination does need a matrix and alternate layers forming a product. The subcombination has separate utility such as vibration damper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
